HUNDREDS of DIFFICULT TASKS DONE MORE QUICKLY • EASILY • SAFELY

WITH
SAMSON
LEVER-JAW

THE FIVE IN ONE WRENCH

● There are two big reasons why these compact Samson Lever-jaw wrenches are able to do so many jobs, so well.

The first is the adjustable jaw construction which allows an instant adjustment to the exact size needed for a firm, no-slip hold regardless of the shape of the object.

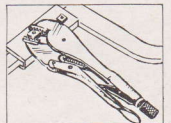

The second is Samson Lever-jaw's utilization of double leverage. This transforms about one pound of pressure from the user's grip into as much as 1000 pounds of pressure on the object in its jaw, if needed.

You'll like the way this handy little tool fits comfortably in your hand. It's expertly designed and made of high quality metal to give you years of faithful service in hundreds of uses.
